

Acceleration Graphs :

- Get slopes from velocity v. time graphs.

Graphs :

- Going from displacement to velocity or velocity to acceleration:
 - Line with slope \rightarrow horizontal line either above or below time axis
 - Horizontal line \rightarrow horizontal line on time axis

Quiz TOMMOROW

- Displacement
- Velocity
- Acceleration
- Graphing
- Vectors

Viscosity

- Ability of a liquid to flow
- High viscosity means liquid is "thick"
- Low viscosity means liquid is "thin"
